PROFESSIONAL SUMMARY

Game Developer with experience developing playable game builds using Unity and C#. Skilled in gameplay feature implementation, debugging, UI development, and iterative design based on user feedback. Proven ability to collaborate across disciplines, document development processes, and meet project deadlines in academic, freelance, and professional settings.

COMPETENCIES

Technical Skills: Unity, C#, GitHub, Aseprite, Figma, Canva, Microsoft Excel, Jira, Trello, Notion

Core Skills: Self-Motivation, Problem-Solving, Critical Thinking, Creativity, Project Management, Leadership, Teamwork

PROFESSIONAL EXPERIENCES

Freelance Game Developer

Nov 2022 - Present

- Created pixel art sprites and animations for Dojojojo, contributing to visual identity and gameplay refinement
- Developed playable game builds based on approved concepts using Unity and C#.
- Designed and implemented UI layouts for educational games in collaboration with Jalan Journey.
- Programmed gameplay systems for an economic simulation game (Breakfast Tales) with Agroath.
- Developed an interactive spin-the-wheel game for a live event at Woods Square Mall with Red Spade Entertainment.
- Conducted testing, debugging, and iteration to ensure smooth gameplay experiences.

Stepping Stone Studios LLP | Program Development Intern

Oct 2020 - Feb 2021

- Designed gameplay concepts for a rhythm-based RPG spin-off with the development team.
- Analyzed player demographic data, identifying trends that informed early monetization considerations.
- Prepared and consolidated development documentation to support project handovers and team continuity.

PROJECT EXPERIENCES

Libra— 2D Symmetry Puzzle (Academic Project)

Jan 2024 - Apr 2024

- Designed and developed a playable prototype using Unity.
- Implemented core gameplay mechanics and integrated art assets.
- Recorded gameplay sessions and documented actionable improvements to enhance gameplay quality.
- Managed version control workflows using GitHub to support team collaboration.

ServeEM — Mobile Arcade (Personal Project)

Dec 2020 - Jan 2021

- Integrated Unity Ads and implemented a leaderboard system using Google APIs to enhance player engagement.
- Developed and published a fully playable version on the Google Play Store.
